

Science/Visions

CHVRCHES

Breathe
Don't speak
It's leaving your body now Slow heart
Set free
A circuit of consciousness When you were truly yourself
You will
Succumb to a permanence A light
By day
A shadow resides by night I (I)
Hear (hear)
Your (your)
Breathing
I (I)
Feel (feel)
You (you)
Leaving With understanding
You won't let it cast you down
A mind full of questions
A current to purify
Science and vision
Be near when I call your name
Or ask me a question I (I)
Hear (hear)
Your (your)
Breathing Breathe
Don't speak
It's leaving your body now
I (I)
Feel (feel)
You (you)
Leaving Heart
Set free
A circuit of consciousness I (I)
Hear (hear)
Your (your)
Breathing Light
By day
A shadow resides by night I (I)
Feel (feel)
You (you)
Leaving With understanding
You won't let it cast you down

A mind full of questions
A current to purify
Science and vision
Be near when I call your name
A mind full of questions
A current to purify
Science and vision
Be near when I call your name
Or ask me a question
