

Watching You

Lea Rue

[Verse 1]

Looking from high down below where do these people go
Leashed by these shadows through so many open doors
The city can steal all your thoughts by giving you more
Scrolling the streets till you lost what you came looking for
I'm listening in with a glass through your paper walls

[Chorus]

I am watching you
I am watching you
All the things that you do
I am watching you

I am watching you
I am watching you
All the things that you do
I am watching you

[Verse 2]

Give me your mind, give me your time
Every little minute of your life
I'll give you my love, I'll give you my life
I'll give you a rush for a little while

You want more and I want more
Think about what you're missing out
No more downs, only ups
You can be everywhere at once

[Chorus]

I am watching you
I am watching you
All the things that you do
I am watching you

I am watching you
I am watching you
All the things that you do
I am watching you

[Bridge]

I know you're better than anyone else in your life
You tell me your secrets but you've been keeping inside
I am there when you're alone and your curtains are closed
Listening and holding a glass through your paper walls

I am watching you
I am watching you
I am watching you
I am watching you
I am watching you
I am watching you

[Chorus]

I am watching you
I am watching you
All the things that you do
I am watching you

I am watching you
I am watching you
All the things that you do
I am watching you
