

# Tonight

## Dive

You, tonight  
You make me feel as if I'm going  
Out of my mind  
I'll hold you close  
Closer than I've ever held you  
Come with me tonight We can't let this go away  
I won't let you get away  
Can't let this go away Why don't these feeling go away  
I miss you all the time  
I just want to be with you  
Forever please be mine  
I will never leave you side  
I'll stay with you  
Just come with me tonight  
You are here  
There's no one I would rather share this  
Feeling with than you  
My eyes are closed  
Cause everytime they are  
I think about the first time you kissed me We can't let this go away  
I won't let you get away  
Can't let this go away Why don't these feeling go away  
I miss you all the time  
I just want to be with you  
Forever please be mine  
I will never leave you side  
I'll stay with you  
Just come with me  
Why don't these feeling go away  
I miss you all the time  
I just want to be with you  
Forever please be mine  
I will never leave you side  
I'll stay with you  
Just come with me tonight I can not sleep  
Left all alone  
Burning inside  
There's nothing left here without you  
You're my escape  
My everything  
I'm yours to take  
There's nothing left here without you

I cannot be myself here without you  
Why don't these feeling go away  
I miss you all the time  
I just want to be with you  
Forever please be mine  
I will never leave you side  
I'll stay with you  
Just come with me tonight
