

Something You Just Don't Forget

Brett Kissel

(Verse)

If it's august in the sunset
You had your hair down, in a red dress
The look of summer on your skin
You walked my way, I lost my breath
And that's something
Yea, that's something you just don't forget

(Verse)

There was a movie, I don't recall it
But I remember I was falling
You laid your head down on my chest
Then you leaned in for a kiss
That's something
Yea, that's something you just don't forget

(Chorus 1)

I remember the moment, the magic
When I looked into your eyes
And the feeling, the passion
The first time that your lips touched mine
And that's something
Yea, that's something you just don't forget

(Verse)

It was a cool night but it was perfect
Even though I was so nervous
When I got down on one knee
There was a crowd around me
And I asked you please baby say yes
And that's something you just don't forget

(Chorus 2)

I remember the moment, the magic
The way the sun lit up your eyes
And the feeling, the passion
Just knowing that you're mine, all mine
And that's something
Yea, that's something you just don't forget

(Chorus 3)

I remember the moment, the magic
When I looked into your eyes
And the feeling, the passion
Just knowing that you're mine, all mine
And that's something
Yea, that's something you just don't forget
Yea, that's something
Yea, that's something you just don't forget
You just don't forget
