

# Stay

## Surfaces

1: Forrest]  
Take me back right to the start  
Before this ache I feel apart  
Closer than the air I breathe  
Never thought I'd see you leaveSomedays, you call me in love  
And I can tell it's real  
Somedays, you take me  
To places I could never feel  
Oh, you're here now  
But life's taking you far away  
Oh, you're here now  
One last chance to hear me say  
Why won't you just stay  
Why won't you just stay, with me  
Why won't you just stay  
Why won't you just stay, with meTake me back when we were young  
By my side under the sun  
Used to be just you and me  
Never thought I'd see you leaveSomedays, you call me in love  
And I can tell it's real  
Somedays, you take me  
To places I could never feel  
Oh, you're here now  
But life's taking you far away  
Oh, you're here now  
One last chance to hear me say  
Why won't you just stay  
Why won't you just stay, with me  
Why won't you just stay  
Why won't you just stay, with me
