

Invisible Things

Lauv

Do you still remember the way
That we felt when we were kids?
Wonder if that place still exists mmm
We lived for the moment and
Fear was a stranger to our lips
I wonder if that place still exists Yeah we built castles out of couches
Fought fire without matches
Made promises without fear of getting burned
Now we are always second-guessing
We think happy is expensive
But every time I am with you I re-learn
It's the invisible things
That I, that I love the most
It's the way that
I feel when I when I hold you close
Cause everything else all comes and goes
It's the invisible things
That I that I love the most
So let me hold you close
So let me hold you close
Oh yeah! Do you remember the last time
You felt something like this?
The way that it felt when we were kids Yeah we built castles out of couches
Fought fire without matches
Made promises without fear of getting burned
Now we are always second-guessing
We think happy is expensive
But every time I am with you I re-learn
It's the invisible things
That I that I love the most
I love the most I love the most
It's the way that I feel
When I when I hold you close
I hold you close I hold you close
Cause everything else all comes and goes
It's the invisible things
That I that I love the most
So let me hold you close
So let me hold you close The way I feel and the way we kiss
Swear that nothing else in the world exists
Shh.. It's the invisible things
That I that I love the most

I love the most I love the most
It's the way that I feel
When I when I hold you close
I hold you close I hold you close
cause everything else all comes and goes
It's the invisible things
That that I love the most
So let me hold you close The way I feel and the way we kiss
Swear that nothing else in the world exists
All you need is someone else all you need is someone
Cross my heart if we could forget something
All you need is someone else all you need is someone
