

# Inner Space

## Souleye

Where do you go, I thought I'd leave a little picture /  
A frozen moment that was captured of you living /  
In this world it's hard sometimes /  
When you wake up wake up / Good morning son let's start the day /  
Got a good good feeling and my hearts a blaze /  
I don't ever want to be the one running away /  
So when I sit and think then I've got something to say /  
I'll never let a day pass by /  
It's hard to survive off a nine to five /  
Or an eight to four or a five to three /  
I'm talking life is reality /  
How we ever going to really be heavenly /  
To all my people on the right /  
We're not going to die /  
To all my people on the left /  
Fighting for their last breath /  
Living in the land of the lost /  
Way before time even had a meaning /  
Equilibrium let's dance to the beat /  
Through the vibration /  
Oh don't go without me / Don't go I'm scared please stay /  
The signs have been painted on your walls today /  
The children are crying in desperation /  
Tears are falling for mother nature /  
Sure there'll be a better land when we finally arrive /  
But for now let us cherish what we holding inside /  
As simple as a look in the eye /  
Or a glance at the moon /  
While its floating on by / Got an open heart / Give an open mind /  
Got to live one another during hard times /  
Don't live your life in rewind /  
Going to make it to the top then recline /  
We all birds of a feather now /  
I burn sage /  
Right before I dedicate a page /  
Sink in to a date base /  
Target audience I know it's all of them /  
We can all live in inner space /  
What's it really mean, I don't want beef /  
I don't even want to wear the sneakers on my feet /  
Trade in all the concrete and switch it with a calm breeze /  
I've got countless amounts of names of companies /

I could tell you a couple but they really the same /  
I don't want to be the one that has to go and tell the people /  
That there doing something wrong in their lives /  
I'd rather be the one that leaves it in the hands of love /  
So when they find it they know that its right /  
A matter of fact to follow a map is truly an act /  
On how to find yourself center it and get on back /  
Back to back with a positive day that's the monologue /  
Living life in the hands of a God /  
Oh don't go without me / Don't go I'm scared please stay /  
The signs have been painted on your walls today /  
The children are crying in desperation /  
Tears are falling for mother nature /  
Sure there'll be a better land when we finally arrive /  
But for now let us cherish what we holding inside /  
As simple as a look in the eye /  
Or a glance at the moon /  
While its floating on by /Where do you go, I thought I'd leave a little picture /  
A frozen moment that was captured of you living /  
In this world it's hard sometimes /  
When you wake up wake up
