

# Right Here Right Now (Neon)

Sander van Doorn

Set your mind off  
Take a deep breath  
Let it all go  
I know you're not perfect  
We speak a language  
Of young hearts  
I want you to know now But when the stars come out  
I want to be with you  
Let the walls drip away  
And make the most of today  
When the stars come out  
I want to be with you  
We could forget about tomorrow  
It's all we've got  
It's right here right now  
Right here right now  
We are young and free  
The more we will love???  
It's right here right now  
Right here right now We can hold on tonight  
Maybe somehow reach the sunrise  
Make every second ours  
We're gonna feel so high  
Floating up to cloud 9 You put a spell on me  
Magical energy  
You put a spell on me  
Magical energy  
When the stars come out  
I want to be with you  
We could forget about tomorrow  
It's all we've got It's right here right now  
Right here right now  
We are young and free  
The more we will love???  
It's right here right now
