

my strange addiction

Billie Eilish

Don't ask questions you don't wanna know
Learned my lesson way too long ago
To be talking to you, belladonna
Shoulda taken a break, not an oxford comma
Take what I want when I wanna
And I want yaBad, bad news
One of us is gonna lose
I'm the powder, you're the fuse
Just add some frictionYou are my strange addiction
You are my strange addiction
My doctors can't explain
My symptoms or my pain
But you are my strange addiction
Deadly fever, please don't ever break
Be my believer 'cause I don't self medicate
And it burns like a gin and I like it
Put your lips on my skin and you might ignite itBad, bad news
One of us is gonna lose
I'm the powder, you're the fuse
Just add some frictionYou are my strange addiction
You are my strange addiction
My doctors can't explain
My symptoms or my pain
But you are my strange addiction
Bite my glass, set myself on fire
Can't you tell I'm crass?
Can't you tell I'm wired?
Tell me "nothing lasts"
Like I don't know
You could kiss my
Asking about my mottoYou are my strange addiction
You are my strange addiction
My doctors can't explain
My symptoms or my pain
But you are my strange addiction
