

# The Sound of Winter

## Bush

[Verse 1]

Mind strong, body strong  
Try to find equilibrium  
Head straight, screwed on  
We screwed up for too long  
I don't want to lean on the waves  
I watched the storm evaporate  
I think of you and starry skies  
That keeps you so alive

[Pre-Chorus]

Let's walk through the fire together  
Disappear in the golden sands

[Chorus]

It's all in your face  
I see a break  
It's like the sound of winter  
The bleeding of love  
The silent escape  
You've got to hang on to yourself  
It's like the sound of winter

[Verse 2]

Medusa smiles and Judas lips  
Open arms and finger tips  
Love bites, and recompense  
I'll be with you until the end

[Pre-Chorus]

Let's walk through the fire together  
Disappear in the golden sands

[Chorus]

It's all in your face  
I see a break  
It's like the sound of winter  
The bleeding of love  
The silent escape  
You've got to hang on to yourself

It's like the sound of winter

[Chorus]

It's all in your face

I see a break

It's like the sound of winter

The bleeding of love

The silent escape

You've got to hang on to yourself

It's like the sound of winter

[Interlude]

Hang on to yourself

Hang on to yourself

It's like the sound of winter

[Chorus]

It's all in your face

I see a break

It's like the sound of winter

The bleeding of love

The silent escape

You've got to hang on to yourself

It's like the sound of winter

[Outro]

It's like the sound of winter

Hang on to yourself

Hang on to yourself
