

Right Where We Want It

Dustin Lynch

We got the ride, yeah, all gassed up and ready
We got the coolest cooler, chilling in the back of my Chevy
We got diamonds in the sky, silver moon shining on this road
We got hands in the air, wind in our hair, a party on the radio

We got the night right where we want it
We got the world wrapped around our fingers, girl
It sure feels good, don't it?
We gotta pour a little, jump on in
Don't think twice, what we've been waiting all morning
I got you, you got me
We got the night right where we want it
Yeah, it sure feels good, don't it?

Baby say left, and that's right where I'll be turning
Baby say right, alright, we'll get this back road burning
And we ain't gonna slow it down
'Til the sun comes creeping up
We got a good time and the headlights
And there ain't no stopping us

We got the night right where we want it
We got the world wrapped around our fingers, girl
It sure feels good, don't it?
We gotta pour a little, jump on in
Don't think twice, what we've been waiting all morning
I got you, you got me
We got the night right where we want it

We got diamonds in the sky
Yeah the time is on our side

And we got the night right where we want it
We got the world wrapped around our fingers, girl
It sure feels good, don't it?
We gotta pour a little, jump on in
Don't think twice, what we've been waiting all morning
I got you, you got me
And we got the night right where we want it
Oh, we got the night, we got the night, girl

Oh, right where we want it
