

# The Long Way

**Brett Eldredge**

Don't think I've ever seen your kind of pretty  
Wandering around this midnight mad house city  
You got a look that says you got it all together  
So if you don't, mind I'd like to know you better  
Take me the long way around your town  
Where you the queen with the silver crown  
I want the secrets you keep, the shine underneath  
Of the diamond I think I just found  
Take me the long way around  
I'd love to see just where your daddy met your momma  
Your hand-me-down '99 Impala  
Show me the field you danced in clover  
The harvest in October  
When the leaves fall from the sky just like a Sunday drive  
Take me the long way around your town  
Where you the queen with the silver crown  
I want the secrets you keep, the shine underneath  
Of the diamond I think I just found  
Take me the long way around  
Didn't think tonight when I walked in  
I'd be falling for somewhere I've never been  
Take me the long way around your town  
Where you the queen with the silver crown  
I want your red blushing stories  
Your faults and your glories  
That made you who you are right now  
Take me the long way around  
Take me the long way around
