

# Together

**Martin Garrix & Matisse & Sadko**

Diamonds in the dust  
That is all we are  
Some of us give up  
Some dream of the stars There's a change in the wind that's blowing  
And I've still got blood in my heart  
Though we might not know where we're going  
I promise we'll never be apart Just pick me up  
And never let me go  
We don't need much  
As long as we're together, together, together Together, together, together  
Together, together, together  
We don't need much  
As long as we're together, together, together  
As long as we're together, together, together  
As long as we're together, together, together Heads under the sun  
Wait for night to fall  
Some get what they want  
And some they lose it all There's a change in the wind that's blowing  
And we've still got blood in our hearts  
Though we might not know where we're going  
I promise we'll never be apart Just pick me up  
And never let me go  
We don't need much  
As long as we're together, together, together Together, together, together  
Together, together, together  
Together, together, together  
Together, together, together  
Together, together, together  
Together, together, together  
We don't need much  
As long as we're together, together, together As long as we're together, together, together
