## NoMBe

### Verse (1)

Girl you feel like china white  
Make every nerve and fiber rise  
The way you rush inside my mind  
Surprised I got this high tonight  
But I'm fine to drive to a time you like  
Since laws by space and time defined  
Apply to all, but trust me doll, not you and I

### Hook x2

Baby from 9 to 5 AM our stars align  
Rock on from side to side  
Round and round like fireflies  
She wants it all the time  
Wet dreams & lullabies  
I give it my all tonight  
The way I have her calling like  
Yeah x16

### Verse (2)

When you flap your wings that close to me  
I'll chase that wind like you won't believe  
What exactly dear are we supposed to be  
If not the king and queen of our dopamine  
Like therapy, mentally  
But more than that, it's meant to be  
Physically, when I beat that thing like a tambourine  
It's like alchemy, my recipe  
To set you free from the pest that is your dress you see  
Less is more and flesh are we  
Why else would I give you the best of me?  
And if you never leave and stretch out the now  
I'll wrap all in towels  
Let's drench our whole house  
In sweat from our brows

### Hook x2

Baby from 9 to 5 AM our stars align  
Rock on from side to side  
Round and round like fireflies

She wants it all the time  
Wet dreams & lullabies  
I give it my all tonight  
The way I have her calling like  
Come x16
