

# Just Like You Like It

## Backstreet Boys

[Verse 1]

Turn that music way down low  
We'll take it nice and slow  
I'll play it for you, just like you like it  
Oh, we're two shadows in the dark  
Nothing between us but a spark  
I'll light this night up just like you like it

[Chorus]

Girl, it's all for you, everything I do  
You just set the groove  
I'll pour it on, strong and smooth  
We've got all night long  
So, tell me what you want  
I'm gonna love you just like you like it

[Post-Chorus]

Oh, just like you like it

[Verse 2]

I'll brush that hair back off your face  
Girl, let my fingers trace all over you  
Just like you like it  
You breathe my name, I feel the heat  
Now we're on fire in these sheets  
'Cause I'm burning for you, just like you like it

[Chorus]

Girl, it's all for you, everything I do  
You just set the groove  
I'll pour it on, strong and smooth  
We've got all night long  
So, tell me what you want  
I'm gonna love you just like you like it

[Post-Chorus]

Just like you like it  
Oh, just like you like it  
Just like you like it

[Bridge]

I can feel you want to  
In the air, in the air, in the air  
I know where you're going  
I'ma get you there, get you there, get you there

[Chorus]

Girl, it's all for you, everything I do  
You just set the groove  
I'll pour it on, strong and smooth  
We've got all night long  
So, tell me what you want  
I'm gonna love you just like you like it

[Post-Chorus]

Just like you like it  
Just like you like  
Just like you like it  
Just like you like it  
Just like you like it  
Just like you like it  
Just like you like it, just like you like it  
Just like you like it, oh, just like you like it  
Just like you like it, you like it  
Just like you like it

[Outro]

Just like you like it, oh, just like you like it  
Just like you like it, oh, just like you like it  
Just like you like it, just like you like it
