

# Hold On

## HAEVN

Drowning in our days  
As the night owl left his trees  
Calm is raising fast

That our best is shown our worst  
Change, I love the past  
Let go of what we had  
Our lives are on repeat  
Working hard, holding the peace

We will try to overcome  
We will try

And just hold on  
And we'll go on  
And just hold on

If you're worthy  
I can show  
There's a way out

Tell me where we hide  
On the sideline of our life  
Show me what it's like  
When the worries of your chest  
And all that we leave behind  
In this crazy state of mind  
The roses are our ground  
They need rain clouds when without

So they can grow to the sun  
They can grow

And just hold on  
And we'll go  
And just hold on  
If you're worthy  
I can show  
There's a way out

And the truth hurts  
Love burns  
We're growing up  
Learn just a little  
And the truth hurts  
Love burns  
We're growing up  
Learn just a little  
  
Learn just a little
