

# California Girls

## NoMBe

[Verse 1]

She loves the sunlight  
How it paints on her soft skin  
Takes care of those tan lines  
Scar tissue from the morphine

[Verse 2]

Baby, don't you know you are stardust  
And you're a long, long way from home, way from home  
So baby, brush it off like it's sawdust  
Or you'll spend the California days alone, days alone

[Pre-Chorus]

Those California girls got me outside all night

[Chorus]

This is the last straw  
Take it off  
This is the last straw  
Why don't you take it all

[Verse 3]

She ain't never seen the zoo  
With the monkey on her back  
They'd arrest her at the booth  
And then sell her to the lab  
Put a label on the box that says  
Treat it like it's glass  
If she gets one scratch her parents  
Never take her back  
To be honest, she's a liar full of promise  
She thinks her Rolex makes her timeless  
Her famous friends think she's harmless  
I'd burn the bridge with her on it

[Pre-Chorus]

Those California girls got me outside all night

[Bridge]

Pinned down, pinnacle

She looks like a centerfold  
Sinner, cynical (baby)  
Oh my, make her moan  
Amateur, baritone  
Sex drive, like animals

[Outro]

Ooh, how I like the smell of west coast pheromones  
Ooh, how I like the smell of west coast pheromones  
Ooh, how I like the smell of west coast pheromones  
She smells like west coast pheromones  
She smells like west coast pheromones
