

South Side

Thomas Rhett

Please commense shaking your south side
feels good
they're ain't no place
that goin' on
it's goin' around
like a vagabond
it gets in ya bones
like you cought the flu
they're ain't no cure
you just gotta move when you feel the groove
now people on the left
shake your south side
people on the right
shake your south side
every single girl
shake your south side
all around the world
shake your south side
like Memphis
Tennessee
got in bed
with CDB
had a baby
and the baby cried
and made this sound
ain't no lie
it was funkified
people on the left
shake your south side
people on the right
shake your south side
every single girl
shake your south side
all around the world
shake your south side
oh yeah
let me break it down
shake it like salt
shake it like pepper
shake it like champaign, number one record
shake it til you just cant shake it no more
shake that thang all the way to the floor

people on the left
shake your south side
people on the right
shake your south side
people on the left
shake your south side
People on the right
shake your south side
every single girl
shake your south side
all around the world
shake your south side
people on the left
shake your south side
people on the right
shake your south side
people on the left (do it just like that)
shake your south side
people on the right (do it just like that)
shake your south side.
