

# Sheeple

Tom MacDonald

Humans been controlled since the day that they was civilized  
The truth has been so heavily politicized  
If you don't know who's controllin' you and killin' all the little guys  
Find out who you're not allowed to criticize  
Black folks who were never ever actual slaves  
Fighting with white folks who ain't actual Nazis  
Controlled by rich folks who use the news to make hate  
While elite folks control all the political parties  
It's a big lie, tryna make you pick sides  
Tryna make you burn the cities down and kill each other, they got sick minds  
Big lies, defund the police so that there's big crime  
Then take away our freedom to restore order they let die  
Play with people, turn men into women  
Make the counterculture mainstream to mix up the system  
Change the pronouns, if gender is a spectrum, so is privilege  
I know poor white folks and black celebrities with millions  
They starve you wit' a lack of information  
And only give you facts through a branded corporation  
Distort your worldview with an algorithm that changes  
Based on propaganda curated for your engagement

We can't be free (No!)  
Can't have no peace 'til we're on the same team  
But y'all are sheep (Oh!)  
Glued to screens, just part of the machine  
Y'all are sheeple, what do y'all believe?  
To all my sheeple, nothing's what it seems

Hollywood been rottin' your brain, controllin' your mouth  
You say "Lit", "Fleet", "Bet", "Cap", they tryna dumb you down  
They endorse whatever narrative is popular to shout  
And use minorities in movies for diversity clout  
Two sides on the spectrum, but ain't none of 'em honest  
Took the red pill and the blue pill, spit 'em both in the garbage  
Bein' woke used to mean you understood you're a target  
And now it's havin' two good legs and never takin' a step forward  
If you agree, it's free speech, disagree, it's hate speech  
Erase it if it came from anywhere except the mainstream  
Trump supporters labeled as the racists, but that can't be  
Lincoln was Republican, and that's who ended slavery  
Science been politicized, it's easy to see  
A mask became a symbol of which side you believe  
But you'll never cure a sickness 'til you cure all the greed

'Cause the problem with our natural immunity is it's free  
Society is broke and want you locked inside a cubicle  
Addicted to pornography, liquor, and pharmaceuticals  
Tell you that you're fat and poor and you were never beautiful  
Then tweet how much they love you when they hear about your funeral

We can't be free (No!)  
Can't have no peace 'til we're on the same team  
But y'all are sheep (Oh!)  
Glued to screens, just part of the machine  
Y'all are sheeple, what do y'all believe?  
To all my sheeple, nothing's what it seems

If they can't convince you they confuse you, they want you dumb or dead  
They divided you by race, religion, income, and sex  
Made everybody right or left, the hatred got so intense  
If the other side likes oxygen, you'll put a bag on your head  
And the conspiracy theories labeled as misinformation  
It's just the terrifying truth that scares the hell out the nation  
The system treating you like trash and you got rifles to aim with  
Just imagine how they'll treat you when your guns get confiscated  
George Orwell, 1984 was his last lecture  
George called 'em "thought police", now we call 'em fact-checkers  
Government surveillance tryna catch you, they don't ask questions  
Mass incarceration equals capital for cash investments  
The system isn't broke, it's workin' fine  
Oppressive and chaotic is how it was designed  
They say, "If we ain't doin' nothin' wrong, there's nothin' to hide"  
While their agenda and intelligence completely classified  
They don't teach you rights in school, you never learned 'em at all  
'Cause they're easy to remove if you don't know what they are  
The only people you can rule are the criminal ones  
So they force you into corners 'til you're breakin' the law

We can't be free (No!)  
Can't have no peace 'til we're on the same team  
But y'all are sheep (Oh!)  
Glued to screens, just part of the machine  
Y'all are sheeple, what do y'all believe?  
To all my sheeple, nothing's what it seems
