

We Got It Right

Old Dominion

We got the songs
We got the beats
We got the bar
Where we used to meet
We got our names
In the concrete
On Lincoln street
And we got New York
We got L.A
We got that run-down hotel where we stayed
We got so drunk
We jumped in the pool
Slept in all day
And when we were in it
Yeah, we were in it
Long before we said goodbye
Just for a minute
We got it right
We got it right Yeah, we got the looks
We got the lights
We got the days
We got the nights
Even though it ended
We got it right
We got tequila
We got tattoos
Heart with a dagger
Nothing to lose
Black and white strip
From that photo booth
We thought we were cool
And now you got someone else
And I got mine
Neither one of 'em knows that every time
They play Meet Virginia
I'm on your mind
And you're on mine (girl, you're on mine) And when we were in it
Yeah, we were in it
Long before we said goodbye
Just for a minute
We got it right
We got it right Yeah, we got the looks

We got the lights
We got the days
We got the nights
Even though it ended
We got it right And when we were in it
Yeah, we were in it
Long before we said goodbye
Just for a minute
We got it right Yeah, we got the looks
We got the lights
We got the days
We got the nights
We got it right
We got it right
We got it right
