

# Alpha

## Periphery

It's always better on the other side of it  
Wanting what you'll never have  
And it's a goddamn broken state of mind  
Yeah, the one that we've been living in  
It's never greener inside the mess we're in  
Wanting what you'll never have  
The less we are content the more we throw away  
What little time we have left to grow  
Separate mind from hate  
Punch through the unknown  
And it will leave the little time we have  
Stop bleeding on the inside, you are alive  
And it's more than enough to paint the walls that are white  
Can we show the ones who are blind? It's envy eating away at the core of us  
Wanting what you'll never have  
And isn't it the point of living to breathe?  
Knowing this is all we get  
It's never greener inside the mess we're in  
Wanting what you'll never have  
The less we are content the more we throw away  
What little time we have left to grow  
Separate mind from hate  
Punch through the unknown  
And it will leave the little time we have Stop bleeding on the inside, you are alive  
And it's more than enough to paint the walls that are white  
Can we show the ones who are blind?  
Stop bleeding on the inside, you are alive  
And it's more than enough to paint the walls that are white  
Can we show the ones who are blind?  
Can we show the ones who are blind?  
Stop bleeding on the inside, you're are alive  
And it's more than enough to paint the walls that are white Can we show the ones who are blind?  
Stop bleeding on the inside, you're alive  
And it's more than enough to paint the walls that are white  
Can we show the ones who are blind?  
Fly past the withered trees  
Ascend to holy air and breathe Fly past the withered trees  
Ascend to holy air and breathe  
This want is menacing it will not leave us be  
Can we part this? The bastard in our brain will chew until it bleeds  
How did we get like this?  
How did we get like this?

Can we part this?  
Step out in the rain  
Feel life in our veins  
Step out in the rain  
Feel life in our  
Feel life in our veins  
How did we get like this?  
Can we part this?  
The bastard in our brain will chew until it bleeds  
How did we get like this?
