

History

Matthew West

[Verse 1]

It's been a bad day
You've been looking back
And all you can see is
Everything you wish you could take back
All your mistakes
A world of regrets
All of those moments you would rather forget
I know it's hard to believe
Let me refresh your memory

[Chorus]

Yesterday is history
And history is miles away
So, leave it all behind you
But let it always remind you of the day
The day that love made history

[Verse 2]

You know you can't stay
Right where you fell
The hardest part is forgiving yourself
But let's take a walk into today
And don't let your past get in the way

[Chorus]

Cause Yesterday is history
And history is miles away
So, leave it all behind you
But let it always remind you of the day
The day that love made history
Yeah, yeah

[Bridge]

Would you believe that you are history in the making
In the making
Every choice that you are making
Every step that you are taking
Every chain that you are breaking
History is in the making

Every word that you are saying
Every prayer that you are praying
Every chain that you are breaking
History is in the making
History is in the making
History is in the making

[Chorus]

Yesterday is history
And history is miles away
So, leave it all behind you
But let it always remind you of the day
The day that love made history
Yeah, yeah, yeah, yeah

[Outro]

History is in the making
Every word that you are saying
Every prayer that you are praying
Every chain that you are breaking
History is in the making
History is in the making
History is in the making
