

My Fault

Imagine Dragons

I took a walk on a Saturday night
fog in the air
just to make my mind seem clear
where do I go from here?
I see my breath pushing steam through the air
shaking hands run through my hair
my fears, where do I go from here? Is it my fault, is it my fault?
We've been missing each other
We've been missing each other.
My fault, is it my fault?
We've been missing each other
We've been missing each other.
Walking down to the waters edge
asking why I'm here instead of home
now I stand alone.
I stop to stare at the ocean side
Im breathing in just to feel it's side with his
like you were here with me.
Is it my fault, is it my fault?
We've been missing each other
We've been missing each other.
My fault, is it my fault? We've been missing each other
We've been missing each other.
Oh its on the warmest night
its in the brightest light
its when the world is moving.
Oh its in the faintest cry
its in the lovers eye
its when I need you most
And dont you know
Is it my fault, is it my fault? We've been missing each other
We've been missing each other.
My fault, is it my fault?
We've been missing each other
We've been missing each other.
Is it my fault, is it my fault?
We've been missing each other
We've been missing each other.
My fault, is it my fault?
We've been missing each other
We've been missing each other.
