

# Neverending Math Equation

## Sun Kil Moon

I'm the same as I was when I was 6 years old  
And oh, my God, I feel so old  
I don't really feel anything  
On a plane, I can see the tiny lights below  
And oh, my God, they look so alone  
Now, do they really feel anything?  
Oh, my God, I gotta, gotta, gotta, gotta move on  
Where do you move when what you're moving from  
Is yourself?

The universe works on a math equation  
That never, ever, ever really ends  
Infinity spirals out creation on the tip of its tongue  
And it is saying  
"We ain't sure where you stand  
You ain't machines, and you ain't land"  
And the plants and the animals, they are linked  
The plants and the animals eat each other

I'm the same as I was when I was 6 years old  
And oh, my God, I feel so old  
I don't really feel anything  
On a plane, I can see the tiny lights below  
And oh, my God, they look so alone  
Now, do they really feel anything?  
Oh, my God, I gotta, gotta, gotta, gotta move on  
Where do you move when what you're moving from  
Is yourself?

The universe works on a math equation  
That never, ever, ever really ends  
Infinity spirals out creation on the tip of its tongue  
And it is saying  
"We ain't sure where you stand  
You ain't machines, and you ain't land"  
The plants and the animals, they are linked  
The plants and the animals eat each other

Well, oh, my God, and oh, my cat  
I told my Dad what I need

Well, I know what I have and want  
But I don't know what I need  
"Well," he said, he said, he said, he said  
"Where we're going, I'm dead"
