

Wish You Were on It

Florida Georgia Line

In your cup holder was some loose change
He got your cellphone on vibrate
I wish you were on it
There's a road you got to take to get to my place
Faded double yellow lines on two lanes
I wish you were on it I could use a little you right now
Rushing over, running into my house
With want you back tears rolling down your face
Drop your keys on my hardwood floor
Kiss me like you never kissed me before
And girl I swear that's all that it would take
And you know the way
I wish you were on it
Wish you were on it
Wish you were on it
There's a parking spot under the sycamore
And them flood lights on the front porch
I wish you were on it
And through the front door of the stair case
There's a four post down the hallway
I wish you were on it I could use a little you right now
Rushing over, running into my house
With want you back tears rolling down your face
Drop your keys on my hardwood floor
Kiss me like you never kissed me before
And girl I swear that's all that it would take
And you know the way
I wish you were on it There's a heart that needs to unbreak
And you know the way
I could use a little you right now
Rushing over, running into my house
With want you back tears rolling down your face
Drop your keys on my hardwood floor
Kiss me like you never kissed me before
And girl I swear that's all that it would take
And you know the way
I wish you were on it
Wish you were on it
Wish you were on it
