

What's That a Picture Of?

Smallpools

[Verse 1]

Standing all alone, you were staring at your phone
It's lighting up a face that I want to get to know
I'm just a seat away at the corner of the bar
And I can see the way you've been in everybody's arms
You keep it to your chest like you're never gonna share
It's lighting up your face and I wish I didn't care
You crack a little smile, you're addicted to the glow
A cautious look around you, now I really want to know

[Chorus]

What's that a picture of?
What's that a picture of?
What's that a picture of?
That's all I gotta say, but I just can't make a sound
What's that a picture of?
What's that a picture of?
What's that a picture of?
That's all I gotta say, but I just can't make a sound

[Verse 2]

I'm trying just to calm every feeling in my state
I've never been one who can feed into the craze
I crack a little smile, I'm addicted to the glow
Your drink is running down and now I've really got to know

[Chorus]

What's that a picture of?
What's that a picture of?
What's that a picture of?
That's all I gotta say, but I just can't make a sound
What's that a picture of?
What's that a picture of?
What's that a picture of?
That's all I gotta say, but I just can't make a sound

[Bridge]

I'm scared that you won't ever see what you wasted
We could be companions, lovers or be just friends

But now all I want is to see what you're looking at!

[Chorus]

What's that a picture of?

What's that a picture of?

What's that a picture of?

That's all I gotta say, but I just can't make a sound

(Is it your friends in the club?)

What's that a picture of?

(Is it your legs in a tub?)

What's that a picture of?

(Is it your cat named Jack?)

What's that a picture of?

That's all I gotta say, but I just can't make a sound
