

Light Up the Sky

Christina Aguilera

We are the stars up in the sky
We light the darkness you and I
We are the flicker in the night
Never shine so bright We are the strong and though we fall
We fought for love we risked it all
Never back down against the walls
It's what we're living for yeah Keep on rising higher
Blaze the room with fire
Right down to the wire
Rise the fire higher
As we stand together
Chase our dreams forever, forever, forever, forever
Now we have wings we can fly
We can be kings you and I
Wipe away the tears from our eyes
We light up the sky Although the road ahead was long
I was too weak to carry on
You picked me up you were my home
I never stood alone No one can tell us what we want
No one can stop us anymore
No looking back, we're moving forward
No one can take this moment away Keep on rising higher
Blaze the room with fire
Right down to the wire
Rise the fire higher
As we stand together
Chase our dreams forever, forever, forever, forever
Now we have wings we can fly
We can be kings you and I
Wipe away the tears from our eyes
We light up the sky When skies are grey
I'll light your way
I'll be your shoulder
You can lean on me Now we have wings we can fly
We can be kings you and I
Wipe away the tears from our eyes
We light up the sky We light up the sky
Light up the sky
We light up the sky
We light up the sky
