Love Me Now

[Seth Bishop](#)

I was addicted, in trance by your spell
I was your heaven, you were my hell
You were my sickness, you were my soul

You made it feel so right, it was so wrong
Baby its cold outside, won't you just come my way
Just give me one more night to take away your pain
Baby we'll be alright, I know you love the way
The way my body moves drives you insane
Falling down, falling down, falling down tonight
Let me take you away, take you to another life
And love, oh baby love
Just love me now, just love me now
Just take me down, baby take me down
Baby don't go outside won't you please just stay
Just give me one more night to take away your pain
Baby you'll be alright, I know you love the way
The way my body moves, trapped in your veins
Falling down, falling down, falling down tonight
Let me take you away, take you to another life
And love, oh baby love
Baby its cold outside, won't you just come my way
Just give me one more night to take away your pain
Baby you'll be alright, I know you love the way
The way my body moves, drives you insane
Baby come back inside, now you have to stay
Just give me your whole life, I'll take away your pain!
Baby we'll be alright, but don't you run away
That's cause once you're mine
You're fucking mine to stay!
Falling down, falling down, falling down tonight
(Yeah baby fall down tonight)
Let me take you away, take you to another life
(Look into my eyes, look into my eyes)
And love (Yeah baby fall down tonight)
Oh baby love (oh)

Just love me now
