

# Elvis' Flaming Star

## Pond

Laura is learning how to love  
See, can't you see?  
It hurts to see her go  
To parties all alone And I hope they bring back Elvis  
And all the stars of the past  
Together at last  
For a cover show  
And we can make it last  
On the Flaming Star  
The first word  
And the word is let  
They never let you learn  
To be you right 'em all  
Except the word can still be Light up and colour-code your old LPs  
They never turn no more  
It's just a garage rock that rattles to the floor  
Every morning is separating, you and Caroline again  
The look in your eyes, it looks just like the twilight of your life Now you're stone cold tired  
And your wife is getting high with your daughter  
And another guy in the starlight  
And I hope they bring back Elvis  
And all the stars of the past  
Together at last  
For a cover show  
And we can make it last  
On the Flaming Star
