

Dance Through Life

Didrik Thulin

I see clear when i close my eyes
I see past your face
I see past your disguise
I see past your thoughts and into your mind, surrounded by black and white
Grey minds crashing down a sidewalk, they don't want to listen to this dirty talk
They want to dance, dance for the whole world, whole world, their own world
So you want to be a dancer, you want to swing among the stars
You want to go the fast way from Jupiter to Mars
So you want to be a dancer, you want to swing among the stars
You want to go the fast way...
Spinning around in a blurry scene, going up up up I'm a dancing machine
True sound, true light, makes you believe you're in the universe, or somewhere in between
Floating around like a bubble, All pink colors now you are in trouble
Here it goes again, if you want to dance, dance my friend
Dance 'till the end, yeah dance 'till the end
So you want to be a dancer, you want to swing among the stars
You want to go the fast way from Jupiter to Mars
So you want to be a dancer, you want to swing among the stars
You want to go the fast way...
Running it like a supernova with a big, big bang
Your running it like a supernova with a big, big bang
So you want to be a dancer, you want to swing among the stars
You want to go the fast way from Jupiter to Mars
So you want to be a dancer, you want to swing among the stars
You want to go the fast way...
Spinning around in a blurry scene, going up up up I'm a dancing machine
Spinning around in a blurry scene, going up up up I'm a dancing machine
Spinning around in a blurry scene, going up up up I'm a dancing machine
Spinning around in a blurry scene, going up up up I'm a dancing machine
