10,000 Hours

[Ella Mai](#)

Since the day that I was born
I been looking out for love
But never really quite found the one
They say practice makes perfect
I know I deserve it
Sometimes we should do it for funBaby when I clock up I can't wait
Promise this time won't go to wasteFor all we put up now
I won't let your love downI know we're not too far away
Ayeee ayeee
Why you always take so long to call me?
Know I gotta wake up in the mornin'
You know every second adds up to a minuteNeed 10, 000 hours
We can be so in love
Don't stop, I'm counting them up
Run the clock, I be counting them upWe can be so in loveYou know every second adds up to a
minute
Need 10, 000 hours
We can be so in loveI've been right and I've been wrongI've been high and I've been low
But this time I know it's for sure
Cause I'm right where I belong
And we are only getting stronger
Feels good to be down in my soul
Baby when I clock up I can't wait
Promise this time won't go to waste
For all we put up now
I won't let your love down
I know we're not too far away
Ayeee ayeeeWhy you always take so long to call me?Know I gotta wake up in the mornin'
You know every second adds up to a minute
Need 10, 000 hours
We can be so in love
Don't stop, I'm counting them up
Run the clock, I be counting them up
We can be so in love
You know every second adds up to a minuteNeed 10, 000 hoursThere's no time for us holding
out
Cause this love is profound
Let the clock go around
Let the clock go around
Love is best when built from the ground
To your heart I am bound
Let the clock go around

Let the clock go aroundWhy you always take so long to call me?
Know I gotta wake up in the mornin'
You know every second adds up to a minute
Need 10, 000 hours
We can be so in love
Don't stop, I'm counting them up
Run the clock, I be counting them up
We can be so in love
You know every second adds up to a minute
Need 10, 000 hours
