

# Incell Insect

## Souleye

Just drop one seed and you create a whole garden /  
We're all a part inside this intergalactic vibe /  
Here to socialize most of the time /  
I must reside in my mind while I figure out /  
A better route when I'm feeling down with doubt /  
I think about the now and some how /  
I always rise up never plummet /  
Takes a lot of work to finally make it to the summit /  
You lose some you gain some /  
I mean it promise this is a tribe that we create /  
Energetically meshing we are like spirals in ascension /  
Who were sent from a higher realm /  
If one seed can create a whole garden /  
Then you and I are truly unique pieces of art /  
Inside a universe that will never stop rocking /  
Were all one tribe / Trying to get by through our lives /  
The trials of our days passing us bye /  
I blow a kiss to the wind as she's walking on through /  
This is just a small picture of what beauty can do / Hey I think I knew it / Found a better way /  
To be a better man channeling my energy /  
Mary Jane, jeez Louise where did you go /  
My great grandfather even had a tight flow /  
Maybe maestro writing the poem with the same tone /  
To trade those feelings for something more appealing /  
Meaning take away the negative and in with the good right /  
It's time to recycle what you were sent through /  
It is the cause and effect / Don't look back /  
They'll bite you as I journey on through these days of my life /  
Remember family and friends / I hope you're doing alright /  
I look forward to the day when we all re-unite /  
Were all one tribe / trying to get by through our lives /  
The trials of our days passing us bye /  
I blow a kiss to the wind as she's walking on through /  
This is just a small picture of what beauty can do /
