

LSD

J Bigga

L. S. D

L.S.D

LSD

Nobody wants to talk about lsd
So i'm gonna tell you about lsd
It's not like weed
It won't get you high
Lsd is a drug to expand your mind
First off alot of people don't know what they're fuckin with
Take lsd and have a real bad trip
Lsd is a tool it's not a toy
This shit will permanently change your life

L. S. D

L.S.D

LSD

Realize this if you take this drug
There is a five percent chance that you will end up
Permanently gone
It's called a perma-fry
There also is a small chance you will die
First off it will re-arrange the way you think
Reality and fantasy will be more in synch
Lsd will do things to your brain
It makes a permanent change
You will never be the same

L. S. D

L.S.D

LSD

When people say words
You will see the words come out
When bright lights flash
You will hear the lights shout
You will learn to slow time
And how to warp space
You will learn certain things

About the human race

One thing about acid that the cops can't stand
Is after someone's had it they will question their command
One thing about acid that the cops can't stand
Is after someone's had it they will question their command

L. S. D
L.S.D
LSD

Lsd is not a party drug kid
Even if you are a book-worm i suggest that you take it
Taking lsd is not even always fun
But every single person needs to do it just once
It doesn't always feel good and sometimes it's scary
But every single person needs to do lsd
It is not addictive it does not get you high
But the psychedelic trip will free your mind

L. S. D
L.S.D
LSD

A lot of people wonder why the universe is here
Taking lsd will make all of that clear
Religious people really seem to hate lsd
Because it makes religion seem pretty damn silly

Go on a psychedelic journey and you will find
The answer to the universe is all in your mind
Remember how you felt before your very first kiss?
That's how every body is before they do this

L. S. D
L.S.D
LSD

When you first take acid
Here's what you should expect
There are actually no real side effects
Everything that happens
Happens INSIDE your brain
As the tiny molecules build new pathways
At first it might seem like the world is shrinking
Some people say it's like falling or sinking
You will feel taste and smell new things
That were already there
But you just weren't keyed in

If you listen to music
You will SEE the sound
Like a million new colors
Swirling all around
If you think about life
You will find new questions
If you want my advice
Here's a little suggestion
Try not to think by using words
Let the psychedelic trip
Take you on a tour
Ten seconds
Will feel like a year
And you'll finally understand why the universe is here

L. S. D
L.S.D
LSD

You will experience and feel things
That will scare you shirtless
But i promise you
You will not regret this
So what are you waiting for
Go get some ACID
