

# Love Letter

Leona Lewis

I can't wait for the day to end so I can finally see your face again  
We'll find a way if this wish comes true tonight Even though I never met you I still miss you  
I can feel you in my dreams  
And I hope that when you wake up  
Just maybe you'll remember me And now I believe that this is fate  
'Cause baby, we belong together  
I know everything is gonna be okay  
Just as long as we have each other Through the sunshine and through the rain  
I know that it'll last forever  
Just last night I stayed up late and I wrote you a love letter  
Wrote you a love letter Tell me, am I insane? I sent your letter on the window pane  
I thought of you as I let it fly away and away  
Even though I never met you I still miss you  
I can see you in my dreams  
And I hope that when you read this  
Just maybe you'll remember me And now I believe that this is fate  
'Cause baby, we belong together  
I know everything is gonna be okay  
Just as long as we have each other Through the sunshine and through the rain  
I know that it'll last forever  
Just last night I stayed up late and I wrote you a love letter  
Wrote you a love letter  
And I know that we'll always be together, together, together, together Even though I never met  
you I still miss you  
I can see you in my dreams  
And I hope that when you read this  
Just maybe you'll remember me  
And now I believe that this is fate  
'Cause baby we belong together  
I know everything is gonna be okay  
Just as long as we have each other Through the sunshine and through the rain  
I know that it'll last forever  
Just last night I stayed up late and I wrote you a love letter  
Wrote you a love letter  
And I know that we'll always be together, we'll be together, together We'll always be  
'Cause I wrote you a love letter
