

Straight Into the Fire

[Zedd](#)

Take your dark days and send them to the sun and carry on, carry on
To every lover who ever did you wrong, move along, move along
To every dream that drowned this dream and made you small inside
Take your dark days and send them to the sun and carry on and Let it go 'til you let go of all the
anger
And all the words that made you hurt will burn like paper
Straight into the fire, straight into the fire
And let it go until the smoke is gone forever Crack the windows and take the shutters down and
carry on, carry on
Take just one seed and put it in the ground and move along, move along
Cause it's easy to hold on, but so hard to forgive
So take the dark days and send them to the sun and carry on and Let it go 'til you let go of all the
anger
And all the words that made you hurt will burn like paper
Straight into the fire, straight into the fire
And let it go until the smoke is gone forever
I will not rest until I see
The other side
I will not rest until I learn
To say goodbye
