

For King and Country

Taberah

Across the world we march, forward with no fear
Blade to bone, dust to dust, your town shall disappear
Armies left behind, rotting in our wake
Hear our call, fear our might
Your kingdom we shall take
To battle we ride with no fear to die
Make your choice, give your life
Fight for king and country, make your vow
Join the ranks, fight for king and country
If we meet our death, honour to our name
Death conceived, a hero born, dying by the blade
To no one we will bow, we fear no man nor beast
Protect the throne, in god's name
Enslaved by our beliefs
