

The Kids Are Coming

Tones and I

No one wants to listen to the kids these days
Yeah the fibs these days, yeah
They say that we're all the same But they're the ones to blame
Speaking of the young as if we killed someone
But we don't need your guns
We're all too busy on the run
Tryna be someone The kids are coming
The kids are gunning
The kids are running
The kids are coming
The kids are coming
The kids are gunning
The kids are running
The kids are coming for you
No one seems to understand the kids these days
And why we live this way
We got to clean up the mess you've made
Still you don't wanna change
You create the law
But can't control our thoughts
And no we won't be bought
We don't just protest for the fun
We're here to get it done The kids are coming
The kids are gunning
The kids are running
The kids are coming
The kids are coming
The kids are gunning
The kids are running
The kids are coming for you
Now you've gone and done it and we locked you in the basement
Marching through the streets is not the only way to change things
Now you've gone and done it and we locked you in the basement
Marching through the streets is not the only way to change things This never would've happened
when I was a boy!
You kids these days and your millenium items
And your card games
And your loud music
And your hula hoops
And your hopscotch
And your dungarees
And your lollipops

And your Sony Playstations
And your...The kids are coming
The kids are gunning
The kids are running
The kids are coming
The kids are coming for you
