

We Belong Together (feat. Danielle Haim)

Vampire Weekend

We go together like sound and sight

Black and white, day and night

We go together like left and right

Oh, we go together

We go together like give and take

Pains and aches, real and fake

We go together, don't be opaque

It's clear we go together

We belong together

We belong together

Baby, there's no use in being clever

Baby, it don't mean we'll stay together

We go together like pots and pans

Surf and sand, bottles and cans

We go together like lions and lambs

Oh, we go together

We go together like Keats and Yeats

Bowls and plates, days and dates

We stay united like these old states

It's how we go together

Hallelujah, you're still mine

All I did was waste your time

If there is not some grand design

How'd this pair of stars align?
