

We Are

HAEVN

Walking through the dark night
Calling out a name
Waiting for an answer

How do we end up here

Try to find a shoreline
With no ground beneath my feet
And they shine their mind up
And try to understand

Cold, we are, we are, we are
And cold, we are, we are, we are
Baby we're lost
Come home
With me
Baby we're lost
Come home

Once we were in sunlight
With nothing in between
Now we share a distance
Our shadows at our feet

I'm blinded by the silence
No horizon that I see
Feel the cold the friend drops
Salted by my tears

Cold, we are, we are, we are
And Cold, we are, we are, we are
Baby we're lost
Come home
With me
Baby we're lost
Come home

And we walk until
A new day will break
Until the heart ways off

And the storm will fade
And we'll talk again
And then be friends
And we'll both will see
That our love has grown

Baby we're lost
Come home
With me
Baby we're lost
Come home

Baby we're lost
Come home
With me
