

Wait

NoMBe

I won't wait this time
No, not now, not again
Not much longer
Every way words might
Might or not, it's so high
Not to ponder Let's make this last forever
'Cause the night's still young
It's true, I feel the pressure
Every time you're gone as long as we're together
This moment last forever And what will she says
Would my heart be torn?
Maybe there's some else to keep her warm
Maybe she's too shy to comment
Twenty one, and too hard to call it
Let's make this last forever
'Cause the night's still young
It's true, I feel the pressure
Every time you're gone as long as we're together
This moment last forever
