

# Stuck in the Waltz

Moddi

I knew I'd heard it before as I fell to the floor  
And lost sight of the books on the shelf  
There is no hard debate, there's no time to wait  
When you have no one to blame but yourself

You know it's all arranged, the seasons will change  
'Cause the sun is in endless decay  
There's no one in control, the earth will revolve  
A little slower with every day

We're all stuck in the waltz

Forgive me, I failed to ignore your depressions once more  
And I failed to ignore that you're here  
It's just that when we hold hands  
Any brief romance turns a little too fast into fear  
And all the quiet words that we've ever heard  
Are the sum of the noises around  
Written with glitter glue on a high-heeled shoe  
Is a note praying "let me be found"

Face it, you're stuck in the waltz  
Face it, you're stuck in the waltz

Under the microscope, where we all find hope  
You'll see nothing but your last defeat  
And as the silence grows, only silence knows  
It gets greater for every beat

I hear the pulse of the drum like dead bones against stone  
He's been caught stealing it from a friend  
Now every single tone is a haunting moan  
Repeating the same tune again

Face it, you're stuck in the waltz, stuck in the waltz  
Face it, you're stuck in the waltz

We're all stuck
